

Parenting Education

We help families who struggle with life challenges and changes.

We offer counseling, education, crisis intervention, and other supports to help people in Central Indiana build more hopeful and resilient futures.

A parent's role is one that requires skills and information to be successfully carried out. Firefly's parenting program seeks to help adults within our community become better-prepared, better-informed parents.

This program is also offered in Spanish.

Parenting can be a rewarding and fulfilling experience, but it can also be challenging. Being a parent is tough and it requires skills and information to be the most effective.

Our Parenting Education classes equip parents with the skills necessary to raise healthy children and manage bad behaviors. Different classes are offered for specific age ranges.

This Program Helps Participants:

- Learn positive discipline techniques
- Increase knowledge of child development
- Build healthy parent-child relationships
- Manage stressful situations
- Set realistic expectations
- Help children attain their developmental goals
- Learn safety tips for all ages

Parent education classes are available to caregivers who want to grow their skill-set and build positive relationships with the children in their lives. The class is guided by a curriculum called Systematic Training for Effective Parenting.

The curriculum progresses through topics of misbehavior, motivation, and discipline. It helps create a space for support and discussion to flourish. These classes are open to court-ordered caregivers.
